**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16 and 22-25, drawn to a submersible fiber optic cable in a motor, classified in class 310, subclass 87.
  - II. Claims 17-21, drawn to a fiber optic splice unit, classified in class 385, subclass 135.
2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because of the submersible motor (Group I), does not require the compression barrels and seals of Group II. The subcombination has separate utility such as a splice unit in other devices than a motors, such as vehicles and communication systems.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2834

4. Because these inventions are distinct for the reasons given above and the compression seals and barrels search required for Group I is not required for Group II, and the downhole motor of Group I is not required of Group II, therefore the restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.
